Kakheti Forestry Service

Kakheti forestry service - Forester: Soso (Iosebi) Turashvili

2016 Year

Stuff of Kakheti Forestry Service

The Kakheti region is divided in 7 forestry districts

Kvaereli forestry
district
60 000 ha.

Telavi forestry
district
60 000 ha

Akhmeta forestry
district
75 000 ha

Sagarejo forestry
district
40 000 ha

Gurjaani forestry
district
25 000 ha

Lagodekhi forestry
district
20 000 ha

Dedoplistskaro-Signagi Forestry
district
20 000 ha

The territory covered by forest is 300 000ha

Licence

we have given the licence for 20 years and at this moment we have 4 licences. The goal of three licenses from is cutting the trees; and only one for Lagodekhi forestry district is for hunting

Akhmeta
forestry
district

14 000 ha
(the goal Forest
Logging)

Telavi
Forestry
district

4 564 ha
(the goal forest
logging)

Kvareli
Forestry
district

9 970 ha
(the goal forest
logging)

Lagodekhi
Forestry
district

5 600 ha
(the goal
hunting)

In Kakheti region we
make 500-600
cutting area.

The volume of the
timber is 120 000 –
140 000 m³.

In the Kakheti region each year is cutting for timber

120 000-130 000 m³.

General – Fagus and Carpinus

The forests of Georgia is rich with the plants.
About 400 species of trees and bushes are grown,
which are combined in 123 breed and family.

Forest of Kakheti general species are:

- *Fagus orientalis* - 60%,
- *Carpinus* - 20%
- *Quercus* - 5%
- And other species (*Castanea Sativa*, *Fraxinus*, *Ulmus*, *Populus*, *Tilia orientalis*, *Pinus*, *Juniperus*, *Taxus Baccata* and so.

Taxus Baccata (Yew), which is widely spread in Kakheti region and these trees are the oldest (relic) trees in Georgia. They grow till 35m this is maximal, diameter – maximal 2m. they live about 3000 years.

The main problem

- ☐ Forest roads
- ☐ Forest fair
- ☐ Small stuff
- ☐ Non legal cutting

Thank you for your attention
